PROFESSIONAL SUMMARY

Full Stack Software Engineer with professional experience building AI-powered Shopify applications, scalable web platforms, and backend workflow automations using React, Node.js, TypeScript, and Python. Experienced in designing REST APIs, authentication systems, third-party integrations, and end-to-end product delivery.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C/C++

Frontend: React.js, Angular, TanStack Query, HTML5, CSS3

Backend: Node.js, Express.js, Flask, REST APIs

Databases: MongoDB, MySQL, PostgreSQL

Ecommerce: Shopify App Development, Shopify APIs, Liquid, Webhooks

AI / ML: RoBERTa, Hugging Face Transformers, NLP, Sentiment Analysis

DevOps / Tools: Git, GitHub Actions, Docker, n8n, Inngest, Clerk Auth, CodeRabbit, Linux, Postman

Authentication: JWT, OAuth, Clerk

WORK EXPERIENCE

91social Software Pvt. Ltd.

Bangalore, Karnataka

Software Development Engineer

2025 – Present

- Engineered and shipped a production-grade custom Shopify application leveraging AI to automate SEO content generation, reducing manual content creation time by 40% for merchant clients.
- Architected end-to-end backend workflow automations using n8n, eliminating 3 hours of daily manual data processing and improving pipeline efficiency by 30%.
- Independently delivered multiple full-stack client applications, owning the complete software development lifecycle from requirements gathering to deployment.
- Developed custom Shopify applications and storefront features using Shopify APIs, OAuth, Liquid, and RESTful services to streamline merchant workflows.
- Integrated Google Analytics, third-party APIs, and backend services to deliver scalable, maintainable, and data-driven web applications.

Samsung Innovation Campus

Bangalore, Karnataka

ML & Programming Trainee (Coding & Programming Track)

Feb 2023 – Mar 2023

- Developed predictive ML models using supervised learning algorithms across multiple datasets, achieving 20% improvement in accuracy over baseline implementations.
- Analysed large datasets to identify key trends and patterns that directly informed strategic recommendations presented at the programme showcase.
- Researched state-of-the-art AI advancements; findings were incorporated into programme curriculum demonstrations.

PROJECTS

TalentIQ - React • TypeScript • Node.js • Express • Clerk • Inngest • PostgreSQL

[Talent-IQ](#)

- Architected a full-stack collaborative coding and interview platform featuring an in-browser code editor, isolated execution sandbox, and real-time video collaboration for interviewer-candidate sessions.
- Implemented secure authentication (Clerk / OAuth / JWT), 2-participant room locking, and background job processing via Inngest, reducing failed session events by 20%.
- Integrated GitHub workflow automation (branch creation, PRs, merges) and CodeRabbit for automated code reviews, cutting review turnaround time by 30%.
- Built real-time features — live dashboard stats, screen sharing/recording, solo practice mode, and chat — using React, Node.js, Express, and TanStack Query.

SentimentAI — NLP Sentiment Analysis Web Application

[Sentimental-Analysis](#)

- Built and deployed a Flask web application performing real-time sentiment classification with probability scoring through an interactive web interface.
- Integrated Hugging Face cardiffnlp/twitter-roberta-base-sentiment (RoBERTa) model, achieving classification accuracy on evaluation data.
- Optimised inference pipeline to return predictions in under 50 ms average latency, enabling interactive real-time use.

EDUCATION

Cambridge Institute of Technology

Bangalore, Karnataka

Bachelor of Engineering – Information Science & Engineering

2021 – 2025

CGPA: 8.94 / 10
