EDUCATION

Cambridge Institute of Technology (2025)

Bachelor of Engineering in Information Science

Bangalore, Karnataka

CGPA: 8.94

PROJECTS

Sentiment Analysis

- **Web-based Flask app for sentiment analysis:** The app provides a simple interface where users can input text to analyze sentiment.
- **Utilizes RoBERTa for predictions:** It leverages the pre-trained cardiffnlp/twitter-roberta-base-sentiment model to classify input text as positive, neutral, or negative.
- **Displays sentiment with probabilities:** The app not only shows the predicted sentiment but also provides the probability scores for each class, offering more insight into the confidence of the prediction.

Full-Stack Collaborative Coding & Interview Platform

- **Developed a full-stack collaborative coding platform** with VSCode-powered editor, secure isolated code execution, real-time 1-on-1 video rooms, chat, and auto feedback using test cases (Node.js, Express, TanStack Query).
- **Implemented authentication (Clerk), room locking for 2 participants**, background jobs (Inngest), GitHub workflows (branches, PRs, merges), and CodeRabbit for automated code reviews & optimization.
- **Built interactive UX features** including live dashboard stats, screen sharing/recording, confetti success animations, and solo practice mode.

EXPERIENCE & INVOLVEMENTS

91social Software Pvt. Ltd.

Software Developer Engineer

Bangalore, Karnataka

2025 - Present

- Developed and deployed a custom Shopify application utilizing AI to automate content generation and optimize e-commerce SEO.
- Architected backend workflow automations using n8n to simplify complex data processes and improve overall application efficiency.
- Managed the end-to-end integration within the Shopify ecosystem to deliver a seamless, fully functional tool for merchants.

Samsung Innovation Campus

Coding & Programming

Bangalore, Karnataka

Feb 2023 - Mar 2023

- Utilized machine learning algorithms and data analysis techniques to develop predictive models for multiple projects, resulting in a 20% increase in accuracy compared to previous models.
- Demonstrated a deep understanding of concepts by conducting thorough research on the latest advancements in artificial intelligence, contributing to the implementation of cutting-edge technologies within the organization.
- Applied hands-on experience with ML algorithms to analyze large datasets, leading to the identification of key trends and patterns that influenced strategic decision-making processes.

SKILLS & INTERESTS

Programming: Python, JavaScript, C/C++

Web Development : React, Angular, Node.js, Express, HTML, CSS

Database & Tools : MySQL, MongoDB, N8N
